

## **Our quality policy**

FALCON-VISION's quality policy is based on the company's business goals and features. Through our regular annual internal audits and management reviews we ensure that our declared quality policy is in compliance with our activity.

Our company's goal is to develop reliable measuring and inspection equipment and custom-made machines that can be used by our customers to save cost on quality and to gain more orders by continuously improving their own product quality. We carry out this activity during the development process by always maintaining direct contact with our clients, whose employees can always have an insight into the project status. We are committed to satisfying the needs of our customers and all other stakeholders at the highest possible level.

We also strive to raise awareness of these goals in our staff. We want to acquire and maintain the confidence of our clients through transparent, fair, well-organized and good-spirited work, and to gain more and more customer orders through our references. In order to achieve this, the management ensures that its quality objectives are known and understood by all employees of the company and facilitates their realization and the formulation of additional goals.

We expect our suppliers and subcontractors to be committed to our principles, to acknowledge them as their own. They should help us achieve our goals with the quality of their products and services.

Our mission: "Cooperation with the customer for the successful implementation of projects."

On behalf of all of FALCON-VISION's staff:

Horváth Csaba, Kőhalmi József, Lakatos Zsuzsa  
directors
